

Economic indicators provide structured, low latency data to blackbox applications.

GLOBAL ECONOMIES CHANGE DAILY

Global economic indicators are an essential primary source for developing and fine-tuning event-driven strategies for trading, risk management and compliance. Given the different release mechanisms generated by governments and economists around the world, firms need a simple, consolidated and reliable way to acquire accurate data quickly and deliver it directly into algorithmic non-display applications (black boxes).

ECONOMIC INDICATORS PROVIDE CLARITY

Bloomberg economic indicators provide timely, comprehensive and accurate global coverage for market-moving economic, central bank and industry datasets. Like our textual news and analytics, this low-latency feed of machine-readable data is designed for black box applications and delivered through Bloomberg's real-time infrastructure.

Economic indicators cover a wide range of regions, industries, governments and third-party sources and an even more diverse number of time series spanning the complete spectrum of economic data. In addition, they feature composite survey figures derived from data provided by participating economists as well as information acquired with our proprietary website scraping techniques.

FAST, ACCURATE, STRUCTURED DELIVERY

Economic indicators are delivered through Bloomberg's proven real-time infrastructure, so firms can expect exceptional speed and resiliency. For consensus data, we send an aggregate number rather than individual economist estimates. If there is a change or a new economist survey, we provide Bloomberg survey numbers on the economic indicators in the feed.

PROACTIVE FOLLOW-UP

While most economic indicators are released according to a specific schedule, not every organization meets these deadlines consistently. Bloomberg uses advanced scheduling to track expected dates of release and proactively follow up with sources when data does not arrive in a timely manner.

BROAD AND DEEP ECONOMIC COVERAGE

- Market-moving, macroeconomic and industry-level statistics
 - Feeds span 230 countries and/or geographic regions
 - Sources include more than 800 government and third-party providers
 - Coverage includes more than 13,000 individual time series for:
 - Consumer prices
 - National accounts
 - Labor markets
 - Housing markets
 - Business conditions
 - Indicator forecasts from Bloomberg Global Data analysts
 - Separate feeds for world economic statistics and global bank rates
-

BLOOMBERG FOR ENTERPRISE

To succeed today, financial institutions must respond to challenges that are not addressed by traditional approaches. They require world-class solutions that integrate people, processes, information and technology for the front office, middle office and operations. Bloomberg partners with these institutions to protect and capitalize on data, manage risk, deliver transparency and control costs. Through enterprise-level expertise and three decades of deep industry experience, Bloomberg creates real value through the use of innovative technology that turns data into a strategic asset.
